ADVANCING SUSTAINABLE DEVELOPMENT THROUGH SCIENCE, TECHNOLOGY AND INNOVATION POLICIES AND INITIATIVES FORUM

VENUE: HALL 6B, KLCC

ADVANCING SUSTAINABLE DEVELOPMENT THROUGH SCIENCE, TECHNOLOGY AND INNOVATION POLICIES AND INITIATIVES | IGEN 2022 Conference

Globally, governments and businesses are pursuing their own paths to achieve their sustainable development goal. Malaysia's vision of achieving developed nation status via the 2030 Agenda, charts a development path that balances economic growth with social inclusion and environmental sustainability. For effective implementation, the government is enhancing collaboration with the private sector, which would ideally align its sustainable development goal with the national direction.

Sustainability aspects, including environmental and climate change are part of the national challenges being addressed by MOSTI through National Policy on Science, Technology & Innovation (NPSTI) 2021-2030, 10-10 Malaysian Science, Technology, Innovation and Economy (MYSTIE) Framework and programs/initiatives formulated by MOSTI that support other policies such as Shared Prosperity Vision (SPV) 2030, Green Technology Master Plan Malaysia (2017-2030), Sustainable Development Goals (SDGs) and Environmental, Social and Governance (ESG). This session will discuss on the initiatives undertaken by MOSTI and its agencies as well as exploring potential collaboration with stakeholders in addressing common challenges.
